

Sample_Tornado_Cash

Case: Sample_Tornado_Cash · generated 2026-06-30T23:44:20Z

Read this first. This report is a **frozen snapshot** generated at the local-clock time above; on-chain state may have changed since. It reflects only data acquired under the **applied bounds** below and therefore does **not** imply completeness. Provisional (tip) facts are drawn dashed/faded. Source claims that disagree are shown side-by-side, never merged. Bitcoin input→output links are a labeled tracing **convention** (FIFO) or an explicit investigator assertion — never ground-truth flow.

Graph

● address ■ bitcoin transaction (routing) ◆ external (mint/burn/coinbase) green = transfer brown = tx input red = tx output dashed = provisional ● red halo = sanctioned/risk teal ring = attributed entity △ possible-coinjoin blue dashed = FIFO trace (convention) ★ seed / anchor edge label = value; width ∝ value

Risk & sanctions

1 address(es) screened as SANCTIONED; 1 address(es) carry a risk/sanctions claim. Each source's claim is shown side-by-side, never merged or averaged (Invariant #4). A sanctions hit is a sourced claim, not a fact about the chain.

address	chain	category	source	score	rationale / designation
0x722122df...145b6967	ethereum	sanctioned	ofac-sdn		OFAC SDN: TORNADO CASH (CYBER2)

Traces

No traces in this case.

Findings

No findings composed.

Investigator notes

No investigator notes.

Entities

Tornado Cash (id: `tornado_cash`) resolved
